EDUCATION

Polytechnic University of the Philippines, Manila
Bachelor of Science in Computer Science

August 2023 - July 2027

Relevant Coursework: Database Systems, Software Engineering, Backend Development

EXPERIENCE

UI/UX, Researcher, Pitcher | Byteime UST CSSprint Hackathon (1st Place)

December 2025

- **Project Clara Secured 1st Place out of 16 teams** by delivering the winning pitch that framed the "Work Kumare" narrative, effectively communicating the unique value of an empathetic AI over traditional surveillance tools.
- **Led user research and problem validation**, utilizing data on Gen Z workplace anxiety (identifying 40% stress rates) to pivot the product strategy toward psychological safety and ethical conflict resolution.
- **Designed a human-centric UI/UX** that translated complex AI agents (like "Ethical Drift Detector" and "Trust Currency") into a friendly, non-threatening dashboard, ensuring the interface fostered trust rather than fear.

Pitcher and Researcher | GCash AI Week GenAI Hackathon (Top 12 Finalist)

March 13, 2025

- **Selected as a Top 12 Finalist (Top 6%)** from over **200+ teams** nationwide, competing against top universities to innovate GenAI solutions for the Philippine fintech sector.
- **Delivered the strategic pitch** for a collaborative financial tracking platform, successfully demonstrating the solution's market viability to GCash executives.
- **Spearheaded user research**, identifying four critical pain points in group money management which directly shaped the product's core value proposition.

Backend Developer | ByteMinds Software Solutions (Remote)

April 2025 – December 2025

- **Accelerated API response times** by refactoring legacy backend services and optimizing database indexing for high-volume client applications.
- **Maintained on-time delivery rate** across multiple concurrent projects by coordinating backend development cycles and Agile sprint planning.
- **Reduced system error rates** by implementing secure REST APIs and structured error handling, significantly improving application stability and data integrity.

Backend Developer Intern | Oikos Technologies (Remote)

July 2025 – August 2025

- **Increased internal data visibility** by engineering comprehensive admin dashboards and leasing management tools for the operations team.
- **Boosted page load performance** by developing optimized Spring Boot microservices featuring server-side caching and structured routing.
- **Enhanced system maintainability** by refactoring monolithic code into a modular architecture, ensuring clean separation of concerns and easier scalability.

Backend Developer | BPI Datawave Hackathon (BizAI)

September 27 – November 20, 2024

- **Reduced loan simulation steps by 40%** by integrating a ReactJS frontend with custom backend logic, streamlining the user journey for MSME clients.
- **Defined three core product features** by conducting market research on MSME financial pain points and synthesizing findings into actionable development requirements.

- **Validated product efficacy** by delivering a live technical demonstration of the automated loan recommendation engine to a panel of industry judges.

Backend Developer | BPI Datawave Hackathon (SeedSync)

July 2025–August 2025

- **Engineered an AI-assisted matching engine** using Node.js, FastAPI, and TensorFlow, successfully automating the connection between farmers and buyers.
- **Achieved sub-second data latency** for user interactions by architecting real-time communication workflows using Socket.IO and Redis.
- **Standardized deployment pipelines** by implementing containerized services via Docker and securing endpoints with JWT authentication.

Frontend Developer | Google Developer Group SparkFest 2025

February 2025

- **Streamlined event navigation for 100+ participants** by developing a responsive interactive guide using React, Tailwind CSS, and ShadcnUI.
- **Ensured UI consistency** across all application pages by architecting reusable interface components and enforcing strict design system guidelines.

Frontend Developer | Google Developer Group SparkFest 2025

February 2025

- **Streamlined event navigation for 100+ participants** by developing a responsive interactive guide using React, Tailwind CSS, and ShadcnUI.
- **Ensured UI consistency** across all application pages by architecting reusable interface components and enforcing strict design system guidelines.

Frontend Developer| TaraTale (Contract)

September 2025 – November 2025

- **Engineered a gamified mobile learning prototype** using Java and Kotlin, integrating interactive story modules and quizzes to drive user engagement.
- **Improved interface responsiveness by 50%** by optimizing layouts for diverse screen sizes and adhering to early-childhood accessibility standards.

LEADERSHIP AND COMMUNITY INVOLVEMENT

Executive Director – Skills and Technology Engineering

Microsoft Student Community, PUP Manila

June 2025 – Present

- Upskilled **100+ community members** in Azure and AI technologies by orchestrating the department's technical workshops and hackathon initiatives.
- Improved cross-team coordination by **50%** by re-architecting internal Discord systems and implementing automated bot workflows.
- Enhanced organizational productivity by directing the development of internal software tools that digitized manual administrative processes.

Workshop Speaker & Facilitator

Google Developer Group – PUP Manila

November 2024 – August 2025

- Facilitated backend development workshops for over **150 students**, delivering hands-on training in API design and server-side logic.
- Improved participant project completion by **40%** by authoring comprehensive technical learning materials and code starter kits.

TRAINING

TESDA JAVA NC III

July 2025

TECHNICAL SKILLS

Languages: Java, Kotlin, Python, TypeScript, JavaScript, C, SQL, HTML5, CSS3

Frameworks & Backend: Spring Boot, Node.js, Express.js, Flask, FastAPI, React.js, React Native, Tailwind CSS, ShadcnUI

Databases: PostgreSQL, MySQL, MongoDB, Supabase

Developer Tools: Git, Docker, Postman, VS Code
